- It is equipped with a winter recharge kit (Deluxe & Evolution Model).
- It comes equipped with a remote control (Deluxe & Evolution Model).
- It comes equipped with a Lithium Battery (Deluxe & Evolution Model).
- Self programmable with latest software.

## EVOLUTION

Our top-of-the-line model. Stylish Italian design, advanced software and programming and completely automatic operation, Evolution will cut your lawn everyday, to give your yard that fresh, just been cut look, *because it has!*

The Evolution is the only robotic mower with Adaptive Programming Technology. Its learning computer actually reprograms itself to adapt to the cutting requirements of your yard. This not only conserves battery life and lengthens the durability of the electric motors, it also contributes to a healthier looking lawn. Advanced Spiral Cut programming allows the Evolution to concentrate, by spiraling outwards, from any area where it senses higher grass. This feature helps to assure an evenly cut lawn.

LawnBott Evolution is able to cover areas up to 33,000 sq.ft. That represents approximately  $\frac{3}{4}$  acre of lawn! And, it will also navigate slopes of up to 27°.

## DELUXE LT

With advanced Lithium technology, the Deluxe model saves weight while still cutting for up to 3 hours. Advanced Spiral Cut programming increases this mowers efficiency even more. With supplied Lithium battery, advanced Spiral Cut feature, rain sensors-to tell the robot to go home in the event of rain, remote control and winter recharge kit, the Deluxe is a feature packed mower that hits the sweet spot for many homeowners. Able to mow up to 33,000 sq. ft. and slopes up to 27°, the Deluxe can cover all but the largest lawns.

## PROFESSIONAL

Yes, it is our entry level model, but the Professional is anything but simple. Fully autonomous, the Professional model will cut your grass every day, leaving its home docking station as programmed, cutting your lawn for up 3 hours, and then returning to its docking station as its battery gets low, all on its own. After it recharges itself, the Professional will leave the docking station all by itself and cut again!

# Your Lawn Always Well Mowed

The LawnBott will cut your grass everyday. So it is always freshly cut!

## HOW DOES IT WORK?

After laying a simple perimeter wire, the LawnBott will cut your yard automatically. Since it can cut everyday, your yard will be healthier.

## HOW DOES IT RECHARGE?

LawnBott automatically returns to its docking station when its batteries are low. Then, when it is recharged, it will go out and continue cutting. *All on its own!*

## PROGRAMMING

LawnBott has a very simple keypad for programming, less need of technical input.

## FREE YOURSELF

Let the LawnBott do the Work!

KA's new line of Robotic mowers does the work for you! Our robotic mowers will cut your grass, everyday, freeing you to do the things you enjoy. Spend Saturdays with the kids, play golf, relax. It's up to you, with KA, *you have one less thing to worry about.*

The Future is Here.
