RoboMower® Product Data Sheet RL850

Tired of sweating while mowing your lawn?
Want a beautifully manicured lawn effortlessly?

Do the things you really want to do,
while RoboMower mows the lawn for you!

The RL850 is a middle range model, suitable
for lawns up to 1000m² (10,800ft²),
where 52 cm (21")
walk mowers are typically used.

How Does It Work? Simple!

- 1 Tie wire around the edge of the lawn and connect to the perimeter switch. Drive RoboMower to the lawn.
- 2 Press "GO".
- 3 It mows, you don't.

RoboMower® is the ultimate in lawn maintenance

- Simply press a button. RoboMower will do the rest.
- Mows your lawn completely by itself.
- Mulches the grass and eliminates the need to collect the clippings.
- Safe, quiet and environmentally friendly.

It mows. You don't. SM

Convenience

Press the button and RoboMower does all the rest by itself. Press the GO button whenever you like and as often as you like, even at night! The mulching operation also saves you the hassle of disposing the clippings and debris.

Free time

No more spending your weekends mowing the lawn. Now spend your free time with the family and do the things you really like to do.

Safety

Automatic mowing and exclusive safety features not found on other mowers make RoboMower the safest way to mow your lawn, period!

Healthy lawn

Within each mowing session, the RoboMower cuts the grass in several directions, resulting in a much healthier lawn. Thanks to the mulching system most valuable nutrients will return back to your lawn.

High quality of mowing

Automatic mowing and an optimal combination of cutting parameters (blades speed of 5,800 RPM and driving speed of 0.5 meter/sec) result in high quality of mowing and homogeneous beautiful looking lawn.

Environmentally friendly

No gas, no oil, no emissions and virtually silent.
